Visible claim to leadership. The international design awards underline the leader qualities.

Sustainability down to the last detail.

Sustainability and quality “Made in Germany” have been key company principles at Sedus for more than 50 years. Principles that Sedus *terri tory* also embodies and which are reflected in recycling-orientated product design, ecologically tested materials, resource and energy-conscious manufacturing and ongoing quality tests.

This is why, for example, in the manufacture of the veneered *terri tory* fronts only selected woods such as beech, ash and oak from sustainable forestry are used. The jointless edge processing of *terri tory* is also worth it – for the eye and for the environment.

Around the world, Sedus adheres to the principles of the UN Global Compact for human rights, labour standards, the environment and anti-corruption.

Innovative laser edging. Seamless edge processing of the highest quality creates a durable, attractive and environmentally friendly end product.

Native real wood veneers. A fascinatingly beautiful and environmentally friendly base material from sustainably managed forests.

Future ex-works. High quality materials such as melamine make *terri tory* particularly durable even with multiple reconfigurations – and thus particularly sustainable.
